

	AXSource Secure Architecture (ASA)
System Hardware & Software	We understand the importance of keeping your intellectual property safe. AXSource offers secure publishing and maintenance of your electronic regulatory submissions. We employ one of the top publishing software's available and utilize our own hardware for data storage. Company-wide data security protocols have been implemented.
Data Maintenance AXSource Secure Portal (AP)	We have two main competencies: Regulatory Affairs & Information Technology. Our ASA is completely owned and controlled by AXSource. Data is securely maintained, regularly backed up and supported by a Disaster Recovery Plan. If a secure Cloud Service is desired, this can be managed as well for convenient and secure exchange of client data and documentation.
