RestaSol, a Solution to Automate the Management Process

- Transform your business by investing in RestaSol: an independent restaurant management solution, which is a full suite point of sale (POS) system, built on hybrid platform for iOS, Android and browsers that serve elaborate necessities required in the hospitality industry
- RestaSol, developed by **AXSource®**, is complete solution that offers front-end restaurant management and can be integrated with any ERP system to support back office operations
- It supports various business models such as Company Owned Company Operated (COCO), Company Owned Franchisee Operated (COFO) and Franchisee Owned Franchisee Operated (FOFO)
- RestaSol allows for:
 - Multi-tenant, multi-payment function
 - e-Menu device registration with individual tables
 - Real-time updates to the kitchen display system & delivery counter
 - Multiple order status at different processing levels
 - Capturing food information, which provides customers with ingredient lists & nutrition facts

Make RestaSol your Business Advantage

- Automation in restaurant chain operations
- Flexible, powerful and intuitive
- Freedom of ERP system integration
- Can be used on a cloud or on premise
- Robust scheduling
- Hybrid architecture
- Innovative, intelligent and incisive
- Faster deployment of POS, which results in high return on investment

Features Overview
